Overview

This documents covers the requirements for the xiatech integrations including the end point details and mapping. Crew have brought in Xiatech to be their Data warehouse and require the sales feed from Graphene as part of the data sources.

Xiatech ( Accelerate business transformation - Xiatech) are pioneers of hper-integration and Connect your composable business in real-time feeds. They Integrate your systems, unify your data and gather advanced insights with Xfuze, the world's first ML-powered composable Hyper-Integration Platform.

Modules Impacted

- DOTI

Functional Details

The following requirements have been defined.

- After each SALE, PARTIAL REFUND, REFUND and EXCHANGE, Graphene will send the details defined in the mapping to the Xiatech Webhook endpoint.
- This will happen as well as all other integrations and not instead of any existing integrations.
- This will also cover the Web Orders in store.
-

Process Flows

Assumptions

- if future fields are added in future these will be need to be developed, we have not costed to make fields configurable.

Out of Scope

- As part of first scope, no additional static configuration data will be shared like stores, user details, customer details or changes.
- Node Structure

Technical Details

Sale

Field details

Graphene Field	Details	Example
id	This is unique identifier for every transaction in our system. This represents the document created for the transaction	6d71e9ac-f0bd-44c9-a052-6a29da6c7857
createdAt	This is the time the document was created when the transactionID was generated.	2023-09-05T10:48:35.474Z
transCompletedAt	This is the time the transaction was completed.	2023-09-05T10:50:56.658Z
type	This is the type of transaction can be SALE REFUND SALE_REFUND EXCHANGE	SALE
TransactionId	This is the e-Basket transactionID it is sequential.	A0115861
offlineTransactionId	This is only generated if the transaction started as an offline transaction and will always be given a TransactionID once online	
operationStatus	This is the status for sending to Xiatech it will always be "PAY_SUCCESS"	PAY_SUCCESS
saleTotal	This is used during Exchanges to define the the sale amount for the new transaction	
transactionRef	This is the a. unique ID for every transaction based on OrgCode+datetime+random digits. Secondary form of transaction mapping.	yaZxC81952023-09-05T10:48:35.460Z83b6
initiatingModule	This is where the transaction originated from - for this purpose will always be from eBasket	eBasket
storeId	This is the store code provided by crew that represents the store.	195
deviceId	This is the device ID - each device has one and represents which tablet it was completed on.	b052ff11e2b77e47
terminalId	This is the system generated terminal ID made up of storeCode+sequential number.	1952
userId	this is the DB User ID that unique to every user.	215ed8e8-4fca-47cf-a1fe-a0fde8b0edf5
userName	This is the username used by the user in the system.	coopers

baseCurrency	Currency the transaction was completed in.	GBP
basketSummary.saleTotal	This is the basket total used to represent the sub total of the basket before discounts.	197
basketSummary.totalItems	Number of items in the basket, this quantity of items not lines.	4
basketSummary.discountTotal	This is the total amount of discount the basket is taking away based on promotions, discount for both line and transaction.	40
basketSummary.refundTotal	This is used by Partial Refund and Exchanges to define how much has been refunded from the previous transaction it was linked to. It used in Full Refund for full amount.	0
basketSummary.basketTotal	This is the basket total for this specific transactions, for SALE taking saleTotal and taking away discounts.	157
basketSummary.VATTotal	This is the VAT Total of the basket for all items.	26.18
basketSummary.inStore.saleTotal	This is the SUB total for items with delivery method = 3. - meaning instore.	197
basketSummary.inStore.totalItems	This is the total quantity of for items with delivery method = 3.	4
basketSummary.inStore.discountTotal	This is the sum of discounts to take away for items with delivery method = 3.	40
basketSummary.inStore.refundTotal	This is total amount refunded for items with delivery method = 3.	0
basketSummary.inStore.basketTotal	This is the basket total for this specific transaction for items with delivery method = 3.	157
basketSummary.inStore.VATTotal	This is the VAT Total of the basket for items with delivery method = 3.	25.18
basketSummary.webOrder.saleTotal	This is the SUB total for items with delivery method = 1 or 4. - meaning Web Order or Ship to store.	0
basketSummary.webOrder.totalItems	This is the total quantity of for items with delivery method = 1 or 4.	0
basketSummary.webOrder.discountTotal	This is the sum of discounts to take away for items with delivery method = 1 or 4.	0
basketSummary.webOrder.refundTotal	This is total amount refunded for items with delivery method = 1 or 4.	0
basketSummary.webOrder.basketTotal	This is the basket total for this specific transaction for items with delivery method = 1 or 4.	0
basketSummary.webOrder.VATTotal	This is the VAT Total of the basket for items with delivery method = 1 or 4.	0
basketSummary.cnc.saleTotal	This is the SUB total for items with delivery method = 2. - meaning click & collect.	0
basketSummary.cnc.totalItems	This is the total quantity of for items with delivery method = 2.	0
basketSummary.cnc.discountTotal	This is the sum of discounts to take away for items with delivery method = 2.	0
basketSummary.cnc.refundTotal	This is total amount refunded for items with delivery method = 2.	0
basketSummary.cnc.basketTotal	This is the basket total for this specific transaction for items with delivery method = 2.	0

basketSummary.cnc.VATTotal	This is the VAT Total of the basket for items with delivery method = 2.	0
basket.products.SKU	This is the SKU unique identifier for the product	1164883
basket.products.price	The is the description used by the system at point of sale, the language of this is driven by the store configuration	PARKER STRAIGHT JEAN MJH001 34R INDIGO
basket.products.itemLineId	This is the line number for the transaction	75
basket.products.totalLinePrice	This is the price of the item for price x quantity.	150
basket.products.quantity	This is the quantity of the sku ordered.	2
basket.products.fulfillmentId	Location from the which the item is fulfilled. For instore will be current store. For WebOrder will be current store. For Ship to Store it will be the location the item is being shipped. For click & collect it will be the location it is being collected.	195
basket.products.deliveryMethod	Method of item line can be on of the following... 1. Web Order 2. Click & Collect 3. In Store 4. Ship to Store	3
basket.products.deliveryGroup	This defines whether it is all part of the same delivery group or different ones. Not used by crew.	1
basket.products.selectedRRPPrice	For future use to support multi pricing and price levels.	0
basket.products.originFulfillmentId	For exchanges this allows the same line to have been fulfilled differently, not in use by crew.	N/A
basket.lineDiscount.discountAmount	The amount to be subtracted from the line price for the defined itemLineId	32.5
basket.lineDiscount.discountType	What type of discount this can be AMOUNT or PERCENTAGE	AMOUNT
basket.lineDiscount.discountedLinePrice	This is the new line price for the item. With new discounted Unit price x quantity.	97.5
basket.lineDiscount.itemLineId	This is the ItemLineId from the products that is effected by this discount.	1
basket.lineDiscount.name	This is the reason code name the user selected.	EVENT25
basket.lineDiscount.percentageDiscountReasonCode	This is the reason code ID that is held against that reason code.	112
basket.lineDiscount.percentageDiscountReasonName	This is the Reason Name should they differ between discount and price override.	EVENT25
basket.lineDiscount.percentageDiscountValue	this the percentage that has been deducted from the item line if a percentage discount is used.	25
basket.lineDiscount.unitPrice	This is the new unitPrice of the item	48.75
basket.linePromotion.name	The name of the promotion triggered.	AW23 3 for 2 Jersey
basket.linePromotion.displayText	The display text used on the receipt and screen	AW23 3 for 2 Jersey
basket.linePromotion.itemLineId	The itemLineId that is changed due to the promotion.	2
basket.linePromotion.promotionType	The type promotion triggered, can one of the following: 1. % /£ off Line 2. Multi-buy 3. BOGOF	MULTY_BUY

	4. Mutli-Buy Set Price	
basket.linePromotion.promotionInfo	Description held against the promotion	Stores 3 for 2 Jersey
basket.linePromotion.promotionAmount	The amount to be subtracted from the line price for the defined itemLineId	13.11
basket.linePromotion.promotionId	The internal system ID for the promotion - Unique identifier.	86b0e1f5-4b7b-49eb-adfc-023aaa9276d9
basket.linePromotion.promotionLinePrice	The LinePrice for the item triggered.	26.89
basket.transactionDiscount.cncDiscountAmount	Click & Collect discount Amount	0
basket.transactionDiscount.discountAmount	The total amount to be taken off the transaction	16.25
basket.transactionDiscount.discountType	The type of discount, can be AMOUNT or PERCENTAGE	Amount
basket.transactionDiscount.inStoreDiscountAmount	In store discount amount	16.25
basket.transactionDiscount.itemLineIds	The Item lines triggered and effected by the transaction.	1
basket.transactionDiscount.reasonCode	the selection reason code by the user.	Refunded Discount
basket.transactionDiscount.webOrderDiscountAmount	Web Order Discount Amount.	0
basket.taxBreakdown.taxLines.VAT	Each indiviudal Line VAT rate applied to the product.	20
basket.taxBreakdown.taxLines.VATCode	Each indiviudal Line VAT Code applied to the product.	H
basket.taxBreakdown.taxLines.taxableAmount	Each indiviudal Line Taxable total considered.	150
basket.taxBreakdown.taxLines.itemLineId	The Line ID that is relates to dfrom the Products	1
basket.taxBreakdown.taxLines.taxLineTotal	The amount of tax for that line.	25
basket.taxBreakdown.taxLines.PreTax	The price of product before tax. So line price - taxLineTotal = PreTax	125
basket.taxBreakdown.totalTaxableAmount	The basket taxable amount, sum of all products taxable amounts.	232
basket.totalTaxSummary.VAT	Summary of VAT Rate. Each new VAT Rate has a section.	20
basket.totalTaxSummary.VATCode	Summary of VAT Code. Each new VAT Code has a section.	H
basket.totalTaxSummary.PreTaxSum	Sum by VAT Rate of all product PreTax amounts.	193.32
basket.totalTaxSummary.TaxSum	Sum by VAT Rate of taxLineTotal.	38.68
basket.totalTaxSummary.TXrateSum	Sum by VAT Rate of taxableAmount	232

paymentDetails.amount	Amount taken during payment.	232
paymentDetails.hostReferenceId	The payment provider reference.	PFB9LPQHXNFNTM52
paymentDetails.cardType	Type of card if provided, integrated payments have, other payment methods generally don't	visa
paymentDetails.transactionDate	Datetime of the payment	2023-09-05T11:50:27.000Z
paymentDetails.tid	The terminal ID if using a PED.	64933236
paymentDetails.transactionType	The type of payment SALE or REFUND	SALE
paymentDetails.result	The response of whether successful or not. Adyen and our own payment methods use AUTHORISED.	AUTHORISED
paymentDetails.authcode	If provided by the payment provider this is the authorisation code that payment was successful with.	5233
paymentDetails.totalAmount	The total amount paid, same as amount but could be different uses in future.	157
paymentDetails.currency	Currency the payment was made in.	GBP
paymentDetails.cardSchemeId	If provided by the payment provider this is the card scheme used i.e VISA, MEASTRO, not provided with unintegrated.	visa
paymentDetails.paymentType	Tender type can be CARD, CASH, PDQ, GIFT_CARD, PAYBYLINK	CARD
paymentDetails.inStoreAmount	Total amount this payment contributed to instore payment.	157
paymentDetails.webOrderAmount	Total amount this payment contributed to Web Order payment.	0
paymentDetails.shippingAmount	Total amount this payment contributed to Shipping payment.	0
paymentDetails.refResponse	This is the providers referenced response details used for refunds in some integrated providers.	OS6G001693911032001.PFB9LPQHXNFNTM52
paymentDetails.paymentProvider	If integrated payment provider is this gets filled, current provider for Crew - Adyen. Won't be provided on unintegrated or other tenders.	Adyen
paymentDetails.transactionReference	The transaction reference used between PMC and the provider, when online this will be {STOREID}{TRANSACTIONID}. When offline will be the offlineTransactionId	195A0115861
paymentDetails.deviceId	For cash this defines with drawer ID was used, this is unique to the drawer.	71a3c443fe49b965
paymentDetails.drawer.name	For cash this defines with drawer name used	Swindon01
paymentDetails.drawer.type	For cash this defines with type used this will ALWAYS be drawer.	DRAWER
paymentDetails.remainingBalance	For gift card this will provide what the remaining balance should be for the card after the payment was made.	70
paymentDetails.sqNo	For gift card this is the number of payment against the giftcard in this transaction	1
paymentDetails.cardNumber	For gift card this is the card number of the card used for payment.	4201137663849840
paymentDetails.expiryDate	For gift card this is the expiry date of the	18/08/2024

	giftcard used for payment.	
storeNodeStructure.name	This defines the name of the node in the hierarchy of the store that took the transaction. Each is the name linked to the hierarchy level.	Sherborne
storeNodeStructure.nodeType	This is the node heirarchy level, there will always be ORGANIZATION, COMPANY, TRADING_REGION, STORE_GROUP (S), STORE	STORE
transactionStructure.type	This the transaction breadcrumb showing the life of the transaction and each time it is impacted, gift receipts, exchanges, refunds, it updates the new transaction with an additional section in here. This defines the type of the transaction in the breadcrumb.	SALE
transactionStructure.storeId	The store that the transaction was completed in .	195
transactionStructure.transactionId	The id of the transaction for the breadcrumb.	A0115861

Field details

 The partial refund will have the main section show the full transaction and current status of what is left on the transaction + what has been refunded. The `currentTransactionDetails` section shows exactly what has been completed in this transaction specifically, so what has been refunded.

Graphene Field	Details	Example
The rest of the fields are the same as Sale, below is the differences.

Field details

i The exchange will have the main section show the full transaction and current status of what is left on the transaction + what has been refunded or added. The `currentTransactionDetails` section shows exactly what has been completed in this transaction specifically, so what has been refunded and added but what is not from the original transaction.

Graphene Field	Details	Example
The rest of the fields are the same as Sale, below is the differences.
